DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The instantly claimed method for treating an alkali metal carboxylate brine contaminated with chloride ion is neither disclosed nor fairly suggested by the closest prior art: Kurland (US 5,139,981 08-1992). Kurland teaches (Abstract) a process for the removal of halides from liquid carboxylic acids by contacting the halide-contaminated acid with a silver (I)-exchanged macroreticular resin. Kurland, however, neither discloses nor fairly suggests the following modifications of his process required to produce the instantly claimed method:

- a. Treatment of solutions of carboxylate salt (brines) instead of the corresponding free acid;
- b. Use of solubilized silver ion (e.g. dissolved silver nitrate) instead of the resin bound silver ion.

One of ordinary skill in the art would not have been motivated by Kurland's teaching to modify his process as required to produce the instantly claimed process. The instantly claimed process is therefore patentable over Kurland, the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. All Post-Allowance correspondence concerning this application must be mailed to the following address: BOX ISSUE FEE, COMMISSIONER FOR PATENTS, WASHINGTON, DC 20231 or fax them to The Office of Patent Publications at 703-308-5083 in order to expedite the handling of such correspondence (amendments under 37 CFR 1.132; information disclosure statements, formal drawings, etc.)
- Sending Post-Allowance papers to the technology center will only cause delays in matching papers with the case.
